OBJECTIVE

Motivated Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, currently in the 6th semester, seeking an opportunity to apply technical knowledge, develop practical skills, and contribute to innovative technology solutions.

EDUCATION

Kalasalingam Academy Of Research And Education	2023-2027
CGPA:7.44	
Sri Chaitanya Jr College ,Guntur	2021-2023
Marks:880	
Universal High School,pusapadu	2019-2020
Marks:481	

PROJECTS

KAREBOT-STUDENT MANAGEMENT SYSTEM

- Developed a React Native app with Google Sign-In for accessing student resources.
- Implemented offline caching for timetables/calendars, reducing load time by 75%.
- Built a FastAPI backend with Supabase and S3 integration and implemented a multilingual RAG chatbot for resource discovery.

Faculty Availability Finder

- Built a RAG-based system using Google Gemini AI and ChromaDB to convert natural language queries into SQL (92% accuracy).
- Developed an automated timetable PDF extraction pipeline, reducing student wait time by 40% for 50+ faculty schedules.

Anemia Detection Web Application

- Developed a YOLOv8-based conjunctiva segmentation system for anemia detection (F1-score: 80%).
- Built an MLP model for hemoglobin prediction and anemia classification (MSE: 0.1) with FastAPI-based real-time predictions.

TECHNICAL SKILLS

Programming skills : python,java

Web Development : HTML

Developer Tools : Vscode,Github

Operating System : Windows

SOFT SKILLS

- Adaptable and able to intreact quickly with new environments.
- Work efficiently with team members on projects

LANGUAGES

- English
- Telugu

I hearby declare that the information provided above is true and correct to best of my knowledge.
